RATING YEAR	2022
VEHICLE TYPE	Small SUV
ENGINE TYPE	Battery Electric Vehicle (BEV)
BUILT FROM	July 2024
ON SALE FROM	AUS: September 2024 NZ: December 2024
SERIES	n/a
AIRBAGS	Dual frontal, side chest, side head, centre

The smart #1 was introduced in Australia in September 2024 and is to be introduced in New Zealand in December 2024. This ANCAP safety rating applies to all variants.

Dual frontal, side chest-protecting and side head-protecting (curtain) airbags are standard. A centre airbag which provides added protection to front seat occupants in side impact crashes is also standard on all variants.

Autonomous emergency braking (Car-to-Car, Vulnerable Road User and Junction Assist) as well as a lane support system with lane keep assist (LKA), lane departure warning (LDW) and emergency lane keeping (ELK), and an advanced speed assistance system (SAS) with speed sign recognition are standard.

36.62 POINTS
OUT OF 38

The passenger compartment of the smart #1 remained stable in the frontal offset (MPDB) test. Protection was ADEQUATE for the lower legs of both the driver and front passenger. GOOD protection was seen for all other critical body regions for both the driver and front passenger.

The front structure of the smart #1 presented a lower risk to occupants of an oncoming vehicle in the MPDB test (which evaluates vehicle-to-vehicle compatibility), and a 0.48 point (out of 4.00) penalty was applied.

In the full width frontal test, protection of the driver dummy was GOOD for all critical body areas. Protection of the rear passenger chest was ADEQUATE with GOOD protection of all other critical body areas.

In the side impact test, protection of all critical body areas was GOOD and the smart #1 scored maximum points.

In the oblique pole test, chest protection was ADEQUATE, with GOOD protection of all other critical body areas.

The smart #1 is equipped with a centre airbag to protect against occupant-to-occupant interaction in side impacts and it provided GOOD protection for the head of both front seat occupants.

Prevention of excursion (movement towards the other side of the vehicle) in the far side impact tests was assessed as ADEQUATE for both the vehicle-to-vehicle impact scenario and the vehicle-to-pole scenario.

A Rescue Sheet, providing information for first responders in the event of a crash is available, and a multi-collision braking system is fitted.

43.06 POINTS
OUT OF 49

In the frontal offset test, protection offered to all critical body regions of the 10 year and 6 year dummies was GOOD and full points were awarded.

In the side impact test, protection of the head of the 10 year dummy was ADEQUATE while that of other body areas of both the 6 year and 10 year dummies was GOOD.

The smart #1 is fitted with lower ISOFix anchorages on the rear outboard seats and top tether anchorages for all rear seating positions.

Installation of typical child restraints available in Australia and New Zealand showed most child restraints could be accommodated in most rear seating positions, however the Type A capsule could not be correctly installed in the rear outboard seating positions using the seat belt and one of the convertible seats in rearward-facing mode, and one of the booster seats could not be correctly installed in the centre rear position.

* Installation of each child restraint is assessed separately in each position. Installation of multiple restraints has not been assessed and may not be possible.

^ The above list of child restraints has been selected to provide a general indication of the rated vehicle's ability to accommodate various CRS types. ANCAP does not endorse or recommend any one CRS brand or model, nor does it rate the safety of child restraints.

The bonnet of the smart #1 provided GOOD or ADEQUATE protection to the head of a struck pedestrian over most of its surface, while WEAK and POOR results were recorded at the rear of the bonnet, at the base of the windscreen, at the base of the windscreen and on front corners of the bonnet surface.

Protection of the pelvis was mixed, with areas of GOOD and POOR performance, while the bumper showed GOOD results for leg impacts.

The autonomous emergency braking (AEB) system is capable of detecting and reacting to vulnerable road users such as pedestrians and cyclists. Testing of this system showed ADEQUATE performance in the pedestrian test scenarios. The smart #1 has an AEB Backover system fitted to some variants, but no score was awarded as this function is not standard.

GOOD performance was also seen in AEB Cyclist test scenarios, with collisions avoided or mitigated in most scenarios.

HEAD IMPACTS	14.89 (out of 24)

The smart #1 is fitted with an autonomous emergency braking (AEB) system capable of functioning at highway speeds and a lane support system (LSS) with lane keep assist (LKA) and emergency lane keeping (ELK) functionality.

Tests of the AEB (Car-to-Car) system showed GOOD performance with collisions avoided or mitigated in all test scenarios, including AEB Junction Assist where the vehicle can autonomously brake to avoid crashes when turning across the path of an oncoming vehicle.

Tests of lane support system functionality showed GOOD performance, including in the more critical emergency lane keeping test scenarios.

A speed assistance system (SAS) with speed limit information function (SLIF) is standard, informing the driver of the local speed limit and automatically changing the speed accordingly.

A seatbelt reminder system with occupancy detection is fitted to all seating positions. A driver drowsiness monitor system is fitted as standard.

RATING PUBLISHED	October 2024
RATING UPDATED	n/a

MODEL VARIANTS:

ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on the extension of a rating to additional variants of a model.

RATING YEAR (DATESTAMP):

The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and, for vehicles rated from 2018, the Rating Year is the year in which the vehicle was tested.

~ Specifications & availability subject to change. Please check with the vehicle manufacturer for confirmation of vehicle specification.
