1. Identification / recognition

Lettering

2. Immobilisation / stabilisation / lifting

Immobilising the vehicle

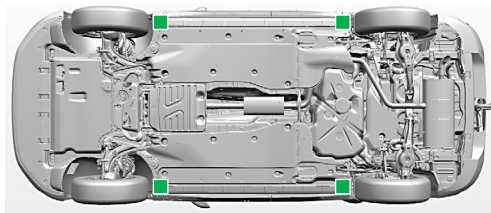

- ① Apply the electronic parking brake
Switch off the ignition
- ② Press the "Start-Engine-Stop" button in the centre console without operating the foot brake

Remove vehicle key, key card and/or smart-phone app so that they are more than 5 m away from the vehicle if possible.

Lifting points

Appropriate lifting points

3. Disable direct hazards / safety regulations

Disconnecting the 12-volt vehicle battery

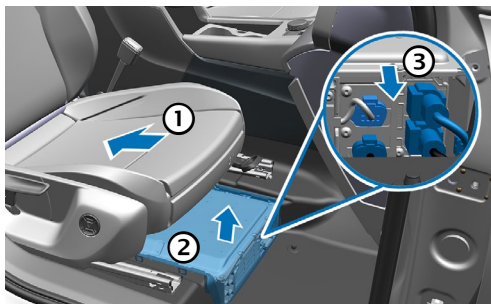

In engine compartment
Disconnect the negative battery terminal

Disconnecting the 48-volt vehicle battery

In the event of an accident in which the airbag is triggered, the 48-volt vehicle electrical system is automatically deactivated immediately after airbag triggering is detected.

For all other cases, the 48-volt vehicle electrical system can be deactivated as follows:

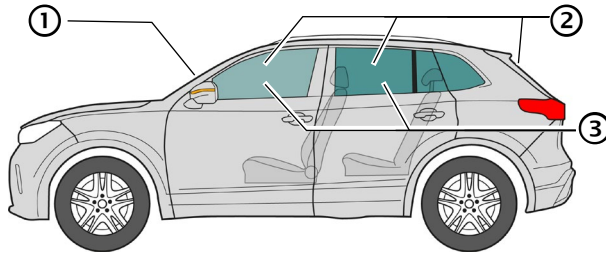

- ① Move the right seat all the way back.
- ② Remove the battery cover in the footwell on the right side of the vehicle.
- ③ Disconnect the control cable and purple battery cables.
