AUDI A7

OVERVIEW

The Audi A7 was introduced in Australia and New Zealand in October 2018. The ANCAP safety rating for the A7 is based on testing of its platform partner, the Audi A6. ANCAP was provided with technical information which showed that the crash test results of the A6 apply to the A7. This ANCAP safety rating applies to all variants of the Audi A7 excluding the RS7.

Dual frontal, side chest-protecting and side head-protecting (curtain) airbags are standard for both the first and second row.

Autonomous emergency braking (City, Interurban & Vulnerable Road User) as well as lane keep assist (LKA) with lane departure warning (LDW) are standard.

ANCAP SAFETY RATING

35.55 POINTS
OUT OF 38

The passenger compartment remained stable in the frontal offset test. ADEQUATE protection was seen for the chest and lower legs of the driver and lower legs of the passenger. GOOD protection was seen for all other critical body regions.

In the full width frontal test, protection was ADEQUATE for the chest of both the driver and the rear passenger, while GOOD protection was offered for all other critical body regions.

In the side impact test, protection offered to all critical body regions was GOOD.

In the oblique pole test, protection was MARGINAL for the chest of the driver and GOOD for all other critical body regions.

The low-speed autonomous emergency braking system (AEB - City) showed GOOD performance across all test scenarios.

FRONTAL OFFSET#	7.31 (out of 8)
FULL WIDTH FRONTAL#	7.53 (out of 8)
SIDE IMPACT#	8.00 (out of 8)
OBLIQUE POLE#	7.19 (out of 8)
WHIPLASH PROTECTION	1.59 (out of 2)
AEB - City	3.93 (out of 4)

Scaled scores. Total test scored out of 16.00 points.

In the frontal offset test, dummy readings indicated GOOD protection for all critical body regions of both child dummies, apart from the neck of the 10 year dummy where protection was rated MARGINAL.

In the side impact test, protection of both child dummies was GOOD and maximum points were scored.

The Audi A7 is fitted with lower ISOFix anchorages on the rear outboard seats and top tether anchorages for all rear seating positions.

Installation of typical child restraints available in Australia and New Zealand showed that most child restraints could be accommodated in most rear seating positions, though several restraints could not be correctly installed in the centre rear seating position, and one of the two selected convertible seats could not be correctly installed in rearward-facing mode using the ISOfix anchorages.

VULNERABLE ROAD USER PROTECTION

81%

38.93 POINTS
OUT OF 48

The Audi A7 has an 'active' bonnet. Sensors detect when a pedestrian is struck and actuators lift the bonnet to provide greater clearance to stiff components in the engine bay. The vehicle was tested with the bonnet in the raised position and GOOD or ADEQUATE results were recorded over most of the bonnet area with some POOR results recorded around the windscreen pillars. The bumper scored maximum points for its protection of pedestrians' legs, with GOOD results at all test locations. Protection of the pelvis was mixed, with areas of GOOD and POOR performance.

The autonomous emergency braking (AEB) system is capable of detecting and reacting to vulnerable road users such as pedestrians and cyclists. The AEB system showed GOOD performance in pedestrian test scenarios, in both daylight and low light, earning full points. GOOD performance was also seen in cyclist test scenarios, with collisions avoided or mitigated in most scenarios.

HEAD IMPACTS	19.00 (out of 24)
UPPER LEG IMPACTS	3.64 (out of 6)
LOWER LEG IMPACTS	6.00 (out of 6)
AEB - Pedestrian	5.43 (out of 6)
AEB - Cyclist	4.86 (out of 6)

The Audi A7 is fitted with autonomous emergency braking (AEB) and a lane support system (LSS) with lane keep assist (LKA) and lane departure warning (LDW) and a blind spot monitoring system (BSM).

Tests of the AEB system showed GOOD results with collisions avoided or mitigated in most test scenarios.

Tests of LKA functionality showed some GOOD performance, however the system does not intervene in more critical emergency lane keeping (ELK) test scenarios and overall performance of the lane support system was classified as ADEQUATE.

A driver-set speed limiter is standard equipment. A speed limit information function (SLIF) is not available.

A seatbelt reminder system with occupancy detection is fitted to all seating positions.

● STANDARD ● NOT AVAILABLE ON BASE VARIANT BUT STANDARD OR OPTIONAL ON HIGHER VARIANTS ○ OPTIONAL ✗ NOT AVAILABLE

MODEL VARIANTS:

ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on the extension of a rating to additional variants of a model.

RATING YEAR (DATESTAMP):

The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and, for vehicles rated from 2018, the Rating Year is the year in which the vehicle was tested.
