RATING YEAR	2022
VEHICLE TYPE	Small car
ENGINE TYPE	Battery Electric Vehicle (BEV)
BUILT FROM	January 2023
ON SALE FROM	February 2023
SERIES	N/A
AIRBAGS	Dual frontal, side chest, side head, centre

The GWM Ora was introduced in Australia and New Zealand in February 2023. This ANCAP safety rating applies to all variants.

Dual frontal, side chest-protecting and side head-protecting (curtain) airbags are standard. A centre airbag which provides added protection to front seat occupants in side impact crashes is also standard on all variants.

Autonomous emergency braking (Car-to-Car, Vulnerable Road User, Junction Assist and Backover), a lane support system with lane keep assist (LKA), lane departure warning (LDW), emergency lane keeping (ELK), and a speed assistance system (SAS) are standard.

35.29 POINTS
OUT OF 38

The passenger compartment of the GWM Ora remained stable in the frontal offset (MPDB) test. Dummy readings indicated GOOD protection for the driver's head and upper legs, ADEQUATE protection for the lower legs and MARGINAL protection for the chest. Protection of the front passenger head, chest and upper legs was GOOD, while protection of the passenger's lower legs was ADEQUATE.

The front structure of the GWM Ora presented a moderate risk to occupants of an oncoming vehicle in the MPDB test (which evaluates vehicle-to-vehicle compatibility), and a 0.98 point penalty was applied.

In the full width frontal test, protection of the driver was GOOD for all critical body regions. Protection of the rear passenger neck was ADEQUATE and the chest was MARGINAL, while GOOD protection was offered for the other critical body regions.

In the side impact test, protection of all critical body areas for the driver was GOOD and the GWM Ora scored maximum points in this test. In the oblique pole test, protection of the chest was assessed as ADEQUATE, all other critical body areas for the driver were rated as GOOD.

The GWM Ora is equipped with a centre airbag to protect against occupant-to-occupant interaction in side impact crashes and it provided GOOD protection for the head of both front seat occupants. Prevention of excursion (movement towards the other side of the vehicle) in the far side impact tests was assessed as GOOD for the vehicle-to-vehicle impact scenario and ADEQUATE for the vehicle-to-pole scenario.

In the frontal offset test, protection of the 6 year dummy head was MARGINAL and neck was ADEQUATE. Protection was GOOD for all other critical body regions of both dummies.

In the side impact test, protection of all critical body areas was GOOD for both child dummies.

The GWM Ora is fitted with lower ISOFix anchorages on the rear outboard seats and top tether anchorages for all rear seating positions.

Installation of typical child restraints available in Australia and New Zealand showed most child restraints could be accommodated in most rear seating positions, however one of the selected booster seats could not be correctly installed in the centre rear position.

* Installation of each child restraint is assessed separately in each position. Installation of multiple restraints has not been assessed and may not be possible.

^ The above list of child restraints has been selected to provide a general indication of the rated vehicle's ability to accommodate various CRS types. ANCAP does not endorse or recommend any one CRS brand or model, nor does it rate the safety of child restraints.

The bonnet of the GWM Ora provided GOOD to MARGINAL protection to the head of a struck pedestrian over most of its surface, with WEAK and POOR results recorded at the base of the windscreen, on the stiff windscreen pillars and the side of the bonnet surface. The leading edge of the bonnet showed mixed results for the pelvis of GOOD to POOR, while the bumper provided GOOD protection to pedestrians' legs.

The GWM Ora is fitted with an autonomous emergency braking (AEB) system capable of recognising and reacting to vulnerable road users. Testing of this system showed GOOD performance in forward pedestrian test scenarios, and MARGINAL to POOR performance in tests of AEB Backover.

In cyclist test scenarios, the AEB system offered overall GOOD performance.

PEDESTRIAN IMPACT TEST (40 KM/H)

The GWM Ora is fitted with an autonomous emergency braking (AEB) system capable of functioning at highway speeds, and a lane support system (LSS) with lane keep assist (LKA) and emergency lane keeping (ELK) functionality.

Tests of the AEB (Car-to-Car) system showed GOOD performance with collisions avoided or mitigated in all test scenarios, including AEB Junction Assist where the test vehicle can autonomously brake to avoid crashes when turning across the path of an oncoming vehicle.

Tests of LSS functionality showed GOOD performance, including the more critical ELK test scenarios.

A speed assistance system (SAS) is standard, informing the driver of the local speed limit and allowing the driver to set the speed accordingly.

A seatbelt reminder system with occupancy detection is fitted to all front and rear seating positions. A driver drowsiness monitor system is fitted as standard on all variants.

MODEL VARIANTS:

ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on the extension of a rating to additional variants of a model.

RATING YEAR (DATESTAMP):

The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and, for vehicles rated from 2018, the Rating Year is the year in which the vehicle was tested.

~ Specifications & availability subject to change. Please check with the vehicle manufacturer for confirmation of vehicle specification.
