LEXUS UX

OVERVIEW

The Lexus UX was first introduced in Australia and New Zealand in November 2018. This ANCAP safety rating applies to all variants.

Dual frontal, side chest-protecting and side head-protecting (curtains) and knee airbags for the driver and front passenger are standard.

Autonomous emergency braking (City, Interurban and Vulnerable Road User), and lane keep assist (LKA) with lane departure warning (LDW), are standard on all variants.

ADULT OCCUPANT PROTECTION

96%

36.69 POINTS
OUT OF 38

The passenger compartment remained stable in the frontal offset test. Dummy readings indicated ADEQUATE protection for the driver's chest and the lower legs of both the driver and front passenger. Protection for all other critical body regions was GOOD.

In the full width frontal test, protection was ADEQUATE for the chest of both the driver and the rear passenger, while GOOD protection was offered for all other critical body regions.

In the side impact test and the oblique pole test, protection offered to all critical body regions was GOOD and the Lexus UX scored maximum points in these tests.

The autonomous emergency braking (AEB) system scored maximum points with GOOD performance in low-speed test scenarios typical of city driving.

FRONTAL OFFSET#	7.17 (out of 8)
FULL WIDTH FRONTAL#	7.68 (out of 8)
SIDE IMPACT#	8.00 (out of 8)

CHILD OCCUPANT PROTECTION

88%

43.13 POINTS
OUT OF 49

In the frontal offset test, protection of the neck of both the 10 year and 6 year dummies was ADEQUATE, while the protection offered to all other critical body regions was GOOD.

Protection of both child dummies in the side impact test was GOOD with maximum points scored.

The Lexus UX is fitted with lower ISOFix anchorages on the rear outboard seats and top tether anchorages for all rear seating positions. Installation of typical child restraints available in Australia and New Zealand showed that all of the selected child restraints could be accommodated in each of the rear seating positions and full points were scored for this assessment.

VULNERABLE ROAD USER PROTECTION

82%

39.44 POINTS
OUT OF 48

The bonnet of the Lexus UX provided GOOD or ADEQUATE protection to the head of a struck pedestrian over most of its surface, with POOR results recorded only on the stiff windscreen pillars. The protection offered to the pelvis was GOOD to MARGINAL, while the bumper provided GOOD protection to pedestrians' legs at all test locations.

The autonomous emergency braking (AEB) system is capable of detecting and reacting to vulnerable road users such as pedestrians and cyclists. The AEB system showed GOOD performance in pedestrian test scenarios, in both daylight and low light, earning full points. GOOD performance was also seen in cyclist test scenarios, with collisions avoided or mitigated in most scenarios.

HEAD IMPACTS	17.07 (out of 24)

OUT OF 13

The Lexus UX is fitted as standard with a range of safety assist features including autonomous emergency braking (AEB) and a lane support system (LSS) with lane keep assist (LKA), lane departure warning (LDW) and blind spot monitoring (BSM).

Tests of the AEB system showed GOOD results with collisions avoided or mitigated in most test scenarios.

Tests of the LSS functionality showed some GOOD performance, however the system does not intervene in more critical emergency lane keeping (ELK) scenarios and overall performance was classified as ADEQUATE.

A speed assistance system (SAS) is also standard, informing the driver of the local speed limit and allowing the driver to set the speed accordingly.

A seat belt reminder system with occupancy detection is fitted to all seating positions.

MODEL VARIANTS:

ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on the extension of a rating to additional variants of a model.

RATING YEAR (DATESTAMP):

The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and, for vehicles rated from 2018, the Rating Year is the year in which the vehicle was tested.
