ANCAP SAFETY

TESTED 2021 ★★★★★

RATING YEAR	2021
VEHICLE TYPE	Large SUV
ENGINE TYPE	Petrol
BUILT FROM	December 2020
ON SALE FROM	February 2021 (NZ) March 2021 (AUS)
SERIES	B-7
AIRBAGS	Dual frontal, side chest, side head, driver knee

The Subaru Outback was introduced in New Zealand in February 2021 and Australia in March 2021. This ANCAP safety rating applies to all variants built from December 2020.

Dual frontal, side chest and side head-protecting airbags and a driver knee airbag are standard. A centre airbag to prevent occupant-to-occupant interaction is not available.

Autonomous emergency braking (Car-to-Car, Vulnerable Road User, Junction Assist and Backover), as well as a lane support system with lane keep assist (LKA), lane departure warning (LDW) and emergency lane keeping (ELK), and an advanced speed assistance system (SAS) are standard on all variants.

ADULT OCCUPANT PROTECTION

88%
33.56 POINTS
OUT OF 38

The passenger compartment of the Subaru Outback remained stable in the frontal offset (MPDB) test. Protection of the driver's chest was MARGINAL and lower legs was ADEQUATE, with GOOD protection offered to all other critical body regions. Protection of the front passenger dummy was GOOD for all critical body regions. The front structure of the Subaru Outback presented a moderate risk to occupants of an oncoming vehicle in this test (which evaluates vehicle-to-vehicle compatibility), and a 1.72 point penalty was applied.

In the full width frontal test, protection of the driver dummy was GOOD for all critical body areas. Protection was MARGINAL for the chest of the rear passenger with GOOD protection offered to all other critical body regions

In the side impact and oblique pole tests, protection offered to all critical body regions was GOOD and the Subaru Outback scored maximum points in these tests.

Prevention of excursion (movement towards the other side of the vehicle) in the far side impact tests was assessed as ADEQUATE for the vehicle-to-vehicle impact scenario and the vehicle-to-pole scenario. A centre airbag or other countermeasure to prevent contact between the heads of front seat occupants in side impacts is not available on the Subaru Outback.

A Rescue Sheet, providing information for first responders in the event of a crash, and a multi-collision braking system are available.

44.62 POINTS
OUT OF 49

In the frontal offset test, protection of the 6 year and 10 year dummies was GOOD for all critical body areas.

In the side impact test, protection of the chest of the 10 year dummy was POOR while that of other body areas of both the 6 year and 10 year dummies was GOOD.

The Subaru Outback is fitted with lower ISOFix anchorages on the rear outboard seats and top tether anchorages for all rear seating positions.

Installation of typical child restraints available in Australia and New Zealand showed most child restraints could be accommodated in most rear seating positions, however the Type E and Type F booster seats could not be safely installed in the centre rear seating position.

VULNERABLE ROAD USER PROTECTION

84%
45.40 POINTS
OUT OF 54

The bonnet of the Subaru Outback provided GOOD or ADEQUATE protection to the head of a struck pedestrian over most of its surface, with MARGINAL and POOR results recorded at the base of the windscreen and on the stiff windscreen pillars. The bumper provided GOOD protection to pedestrians' legs and protection of the pelvis was also GOOD.

The AEB system showed GOOD performance in pedestrian test scenarios, in both daylight and low light, with collisions avoided or mitigated in most scenarios. GOOD performance was also seen in AEB cyclist test scenarios, with collisions avoided or mitigated in most scenarios.

The Subaru Outback is fitted with AEB Backover functionality, however its performance in test scenarios was POOR.

The system's overall AEB performance was classified as GOOD.

The Subaru Outback is fitted as standard with a range of safety assist features including autonomous emergency braking (AEB) and a lane support system (LSS) with lane keep assist (LKA) and emergency lane keeping (ELK) functionality.

Tests of the AEB (Car-to-Car) system showed GOOD performance with collisions avoided or mitigated in all test scenarios, including AEB Junction Assist where the test vehicle can autonomously brake to avoid crashes when turning across the path of an oncoming vehicle or pedestrian. Overall, effectiveness of the AEB (Car-to-Car) system performance was rated as GOOD.

Tests of lane support system functionality showed GOOD performance, including in the more critical emergency lane keeping test scenarios, with overall performance classified as GOOD.

A speed assistance system (SAS) is also standard, informing the driver of the local speed limit and allowing the driver to set the speed accordingly. A seatbelt reminder system with occupant detection is fitted to all seating positions. A driver drowsiness monitor system is fitted as standard.

RATING PUBLISHED	September 2021
RATING UPDATED	December 2022

MODEL VARIANTS:

ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on the extension of a rating to additional variants of a model.

RATING YEAR (DATESTAMP):

The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and, for vehicles rated from 2018, the Rating Year is the year in which the vehicle was tested.

~ Specifications & availability subject to change. Please check with the vehicle manufacturer for confirmation of vehicle specification.
