Occupant Protection.

Frontal Offset Test

Each body region is scored out of 4 points

Head / neck:	4.00 points
Chest:	3.80 points
Upper legs:	4.00 points
Lower legs:	3.78 points

The passenger compartment held its shape well in the frontal offset test. Pedal and steering wheel displacements were mostly well controlled but there was a small deduction for brake pedal displacement. Driver and passenger contact with the airbags was stable. All doors remained closed during the crash. After the crash, all doors could be opened with normal effort.

Side Impact Test

Each body region is scored out of 4 points

Head:	4.00 points
Chest:	4.00 points
Abdomen:	4.00 points
Pelvis:	4.00 points

Good protection was provided for the driver in the side impact test.

Pole Test

Scored out of 2 points

Score:	2.00 points
--------	-------------

The vehicle was eligible for a side pole test because it has side curtain airbags. The vehicle scored the maximum 2 points for head protection in this test.

Whiplash Protection Test

Whiplash protection is assessed to the RCAR Protocol

Geometric test:	Good
Dynamic test:	Good
Overall whiplash rating:	Good

* Head protection only.

ANCAP Safety Rating: MITSUBISHI OUTLANDER (April 2015 – October 2022)

Pedestrian Protection.

Pedestrian Test

Scored out of 36 points

Adult & child head impacts: 16.90 points
Upper leg impacts: 0.00 points
Lower leg impacts: 6.00 points

This vehicle scored 22.90 out of 36 points (Acceptable). The bumper provided good protection to pedestrians' legs and scored maximum points however the front edge of the bonnet offered poor protection in all areas tested. In those areas likely to be struck by the head of a child, protection was predominantly marginal or poor. Good protection was offered by the bonnet in most areas likely to be struck by an adult's head. (2013 model tested by Euro NCAP v5)

Score Deductions.

Deductions from frontal offset test scores

Head / neck: No deduction
Chest: No deduction
Upper legs: No deduction
Lower legs: -0.224 points from foot score (blocked brake pedal)

Deductions from side impact test score

Chest: No deduction

Deductions from pole test score

Head: No deduction

* ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on extending a rating to additional variants of a model. For further information about the application of ANCAP safety ratings to model variants, see the ANCAP Variant Policy.

^ The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and may be based on the year in which a new vehicle model is first launched into the Australian and/or New Zealand markets; the year in which the vehicle was tested (if tested by Euro NCAP); or, for vehicles which hold an existing ANCAP safety rating, the year in which the rating was updated (or earlier applicable year).
