

ALFA ROMEO TONALE

FEBRUARY 2023 - ONWARDS
1.5 PETROL MHEV VARIANTS ONLY

ANCAP
SAFETY

TESTED
2022

RATING YEAR	2022
VEHICLE TYPE	Small SUV
ENGINE TYPE	Hybrid
BUILT FROM	September 2022
ON SALE FROM	February 2023
SERIES	N/A
AIRBAGS	Dual frontal, side chest, side head

The Alfa Romeo Tonale was introduced in Australia and New Zealand in February 2023. This ANCAP safety rating applies to 1.5 petrol MHEV variants only. PHEV variants are unrated.

Dual frontal, side chest-protecting and side head-protecting airbags are standard. A centre airbag to prevent occupant-to-occupant interaction is not available.

Autonomous emergency braking (Car-to-Car, Vulnerable Road User and Junction Assist) as well as a lane support system with lane keep assist (LKA), lane departure warning (LDW) and emergency lane keeping (ELK), and an advanced speed assistance system (SAS) are standard equipment.

32.15 POINTS
OUT OF 38

The passenger compartment remained stable in the frontal offset (MPDB) test. Protection of the driver chest and lower legs was ADEQUATE, with GOOD protection offered to all other critical body regions of the driver, and all body regions of the front passenger.

The front structure of the Alfa Romeo Tonale presented a higher risk to occupants of an oncoming vehicle in the MPDB test (which evaluates vehicle-to-vehicle compatibility), and a 3.99 point penalty was applied.

In the full width frontal test, protection of the driver dummy was GOOD for all critical body areas. Protection was ADEQUATE for the chest of the rear passenger, with GOOD protection of all other critical body areas.

In the side impact and oblique pole tests, protection offered to all critical body regions was GOOD and the Alfa Romeo Tonale scored maximum points in these tests.

A centre airbag or other countermeasure to prevent contact between the heads of front seat occupants in side impacts is not available on the Alfa Romeo Tonale. Tests to measure potential injury risk in far side impacts were therefore not conducted. Prevention of excursion (movement towards the other side of the vehicle) in the far side impact tests was assessed as MARGINAL for both the vehicle-to-vehicle impact scenario and the vehicle-to-pole scenario.

A Rescue Sheet, providing information for first responders in the event of a crash is available, and a multi-collision braking system is fitted.

In the frontal offset test, protection of the neck and chest of the 10 year dummy and the neck of the 6 year dummy was ADEQUATE, while the protection offered to all other critical body regions was GOOD.

In the side impact test, protection of all critical body areas was GOOD for both dummies, and maximum points were scored.

The Alfa Romeo Tonale is fitted with lower ISOFix anchorages on the rear outboard seats and top tether anchorages for all rear seating positions.

Installation of typical child restraints available in Australia and New Zealand showed that all of the selected child restraints could be accommodated in all rear seating positions and full points were scored for this assessment.

* Installation of each child restraint is assessed separately in each position. Installation of multiple restraints has not been assessed and may not be possible.

^ The above list of child restraints has been selected to provide a general indication of the rated vehicle's ability to accommodate various CRS types. ANCAP does not endorse or recommend any one CRS brand or model, nor does it rate the safety of child restraints.

67%

36.23 POINTS
OUT OF 54

The bonnet provided predominantly GOOD or ADEQUATE protection to the head of a struck pedestrian, while WEAK and POOR results were recorded at the rear of the bonnet, at the base of the windscreen and on the stiff windscreen pillars.

Protection of the pelvis was mixed, with areas of GOOD and POOR performance, while the bumper provided GOOD protection to pedestrians' legs.

The Alfa Romeo Tonale is fitted with an autonomous emergency braking (AEB) system capable of detecting and reacting to pedestrians and cyclists. Testing of this system showed ADEQUATE performance in pedestrian test scenarios, however the AEB system does not react to vulnerable road users in reverse, and hence AEB Backover tests were not conducted. In cyclist test scenarios, the AEB system offered GOOD performance.

The Alfa Romeo Tonale is fitted with an autonomous emergency braking (AEB) system capable of functioning at highway speeds and a lane support system (LSS) with lane keep assist (LKA) and emergency lane keeping (ELK) functionality. A blind spot monitoring system (BSM) is optional. Alfa Romeo has advised that a higher grade of AEB and LSS is fitted to vehicles for Australia and New Zealand, but these systems were not standard on the tested vehicle.

Tests of the AEB (Car-to-Car) system showed GOOD performance with collisions avoided or mitigated in most test scenarios, including AEB Junction Assist where the test vehicle can autonomously brake to avoid crashes when turning across the path of an oncoming vehicle.

Tests of lane support system functionality showed GOOD performance, including in several of the more critical emergency lane keeping test scenarios.

A speed assistance system (SAS) is standard, informing the driver of the local speed limit and allowing the driver to set the speed accordingly.

A seatbelt reminder system is fitted to all seating positions, however occupancy detection is not available for the rear seats. A driver drowsiness monitor system is fitted as standard.

TESTED BODY TYPE	5 door SUV
TESTED VEHICLE ENGINE	1.5 GSE MHEV
RATING PUBLISHED	February 2023
RATING UPDATED	October 2023

MODEL VARIANTS:

ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on the extension of a rating to additional variants of a model.

RATING YEAR (DATESTAMP):

The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and, for vehicles rated from 2018, the Rating Year is the year in which the vehicle was tested.

~ Specifications & availability subject to change. Please check with the vehicle manufacturer for confirmation of vehicle specification.
